*Claim Rejections - 35 USC § 112*

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for

a method of making a friction material by immersing a paper body in a first binding agent that comprises a phenol resin and a second binding agent that comprises a silane of the chemical formulae shown on page 5, lines 2-9

does not reasonably provide enablement for any binding agents. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Page 4, lines 14-17 detail the phenol resin to be used, and page 4, line 18 to page 7, line 12 detail the silane resin to be used.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1762

a) Claim 1 and elsewhere: the phrase "type" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "type"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 59-080539.

'539 teaches impregnating paper/powdered filler with a silane, drying, impregnating with phenolic resin, precuring and then curing to yield a durable wet friction material (see Abstracts).

***Allowable Subject Matter***

7. Claims 4-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

8. The following is a statement of reasons for the indication of allowable subject matter:

Art Unit: 1762

The prior art does not disclose nor suggest a method for making a wet friction material by impregnating a paper/filler body with phenolic resin, drying, impregnating with a silane as shown in the chemical formulae of page 5, lines 2-9, drying and then curing.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
